

IMPROVING ID

for **550+ million people**
across **60+ countries**

BETTER IDENTIFICATION BRING
OPPORTUNITIES

Selon l'ID4D Ensemble de données (<https://id4d.worldbank.org/global-dataset>), environ 850 millions de personnes n'ont pas d'ID officielle, et 3,3 d pas accès à l'ID numérique pour les officiels transactions en ligne. L'initiative ID4D fonctionne avec pays (<https://id4d.worldbank.org/country-diagnostics>) pour réduire ce nombre stupéfiant, et assurez-vous que les systèmes d'identification sont accessibles, protègent les personnes droit capables de faciliter les transactions l'ère numérique.

60+ Countries
550+ Million People Impacted

The World Bank's Identification for Development (ID4D) Initiative was created to help countries realize the transformational potential of inclusive identification (ID) systems, including civil registration. ID4D operates across the World Bank with global practices and units working on digital dev social protection, health, agriculture, financial inclusion and integrity, governance, gender, data protection, and research, among others. ID4D wo its sister Initiative—digitalizing government to person payments (G2Px)—to promote ID systems build as part of a broader service stack or Digital Infrastructure (DPI) that can be leveraged to improve service delivery across sectors.
